# What is AMRoC Fab Lab?

- AMRoC Fab Lab is a program of **FCDI**, the Foundation for Community Driven Innovation, Inc. a 501(c)(3) nonprofit.
- **AMRoC** stands for the **A**dvanced **M**anufacturing and **R**obotics Center.
- **Fab Lab** is the educational outreach component of MIT's Center for Bits and Atoms. It is a technical prototyping platform for innovation and invention, providing stimulus for local entrepreneurship, and a place to create, to learn, to mentor, to invent.
- Together the **AMRoC Fab Lab** endeavors to provide the Tampa area community with an unprecedented level of access to resources for turning ideas into reality and stimulating economic growth through active, creative, and cooperative development of knowledge, skills, and productive capacity.

# Why Your Contribution to AMRoC Is So Important

- AMRoC Fab Lab has come together through the intense and tireless contributions of its founders and community volunteers who have applied tens of thousands hours to its development.
- AMRoC provides on-site STEM mentoring to high school students who are learning how to design and build robots, and generously hosted multiple technical events and meetings that have served hundreds since our soft opening in November 2018.
- While the volunteerism is cherished, there are still plenty of operational expenses and bills to pay including rent, utilities, insurance, equipment and supplies which makes your contribution an invaluable component to the success of the FCDI AMRoC Fab Lab here in Tampa.

# Your Contribution Comes With Benefits!

- The Mission of AMRoC Fab Lab is geared to the success of the community through the success of our community partners. When our community partners (you) succeed, our community succeeds.
- Long range benefits to you, our community partner:
  - ✓ First access to employ newly skilled workers
  - ✓ Workforce skills development
  - ✓ Corporate Professional Development
  - ✓ Certification programs
  - ✓ Broad range community recognition
  - ✓ All contributions are tax deductible

# ...And Even More Benefits
