

COVID-19 Health & Safety Policies at AMRoC

Updated May 2022

As of May 2022, we are no longer mandating masks in AMRoC Fab Lab, but recommend that guests remain vigilant, take intelligent health and safety precautions, and always err on the side of common sense and kindness.

- At this time, masks are optional but recommended if a visitor has pre-existing health conditions or is over the age of 60.
- Group/meet-up organizers must clean areas used after a meeting, including tables, chairs, tools, electronics, or other equipment used, with sanitizing cleaners we'll supply.
- In-house tools and equipment used during meetings or events should always be cleaned after use and returned to their proper storage areas.
- **Anyone showing signs of illness is asked not to visit and will be asked to leave AMRoC if cold or flu symptoms are exhibited**, for everyone else's health and safety.

What You Can Do

Ultimately, it is up to individuals to stay intelligently informed, practice safe hygiene and take precautions urged by the CDC and local health departments to prevent the spread of illnesses like the flu and COVID-19. Please use common sense and show respect for others. We're not concerned about YOU getting COVID-19. It's about not inadvertently infecting others who may suffer serious health consequences as a result.

- Sanitize your hands upon entering the Fab Lab and when leaving,
- Wash hands regularly as directed, while on-site, and
- Do Not visit if you're not feeling well.
